#### ВВЕДЕНИЕ

- 1. Оценочные материалы по дисциплине (модулю) является обязательным обособленным приложением к Рабочей программе дисциплины (модуля) и представлены в виде оценочных средств.
- 2. Оценочные материалы являются составной частью нормативно-методического обеспечения системы оценки качества освоения обучающимися указанной дисциплины (модуля).
  - 3. Оценочные материалы по дисциплине (модулю) включают в себя:
- оценочные средства, применяемые при промежуточной аттестации по итогам изучения дисциплины (модуля).
- оценочные средства, применяемые в рамках индивидуализации выполнения, контроля фиксированных видов ВАРО;
  - оценочные средства, применяемые для текущего контроля;
- 4. Разработчиками оценочных материалов по дисциплине (модулю) являются преподаватели кафедры, обеспечивающей изучение обучающимися дисциплины (модуля) в Академии. Содержательной основой для разработки оценочных материалов является Рабочая программа дисциплины (модуля).

#### 3.1. Критерии оценки к экзамену

Оценка «отпично» (86-100 баллов) ставится обучающемуся, если у обучающегося: ответ полный, построенный в соответствии с орфоэпическими, лексико-грамматическими и стилистическими нормами изучаемого языка. Содержание текста понято, реакция на вопросы по тексту быстрая, адекватно выражается личное отношение к проблеме. Грамотно выполнена аннотация к тексту. Устное высказывание строится логично и грамотно, присутствует развернутая аргументация.

Оценка «хорошо» (71-85 баллов) ставится обучающемуся, если у обучающегося: ответ полный, но возможны незначительные неточности, связанные с орфоэпическими, лексико-грамматическими и стилистическими нормами изучаемого языка, не влияющих на общий смысл ответа. Содержание текста понято, даны хорошие ответы на вопросы экзаменатора. Достаточно грамотно выполнена аннотация к тексту. Устное высказывание строится логично и грамотно, но допущены незначительные неточности, не влияющие на общий смысл высказываний, аргументация недостаточно развернутая.

Оценка «удовлетворительно» (56-70 баллов) ставится обучающемуся, если у обучающегося: ответ неполный, построенный не в полном соответствии с орфоэпическими, лексико-грамматическими, стилистическими нормами изучаемого языка. Текст понят не полностью, реакция на вопросы к тексту слабая, в ответах на вопросы допущены ошибки. Аннотация выполнена, однако, со значительным количеством ошибок. Устное высказывание строится нелогично, с лексическими и грамматическими ошибками, слабая аргументация.

Оценка «неудовлетворительно» (менее 56 баллов) ставится обучающемуся, если у обучающегося: ответ неполный, не отвечающий орфоэпическим, лексико-грамматическим и стилистическим нормам изучаемого языка. Содержание текста не понято, нет реакции на вопросы. Устное высказывание построено нелогично, с множеством фонетических, лексических и грамматических ошибок. Аннотация выполнена с многочисленными ошибками или не соответствует требованиям аннотаций текста, неправильное использование речевых клише в результате непонимания содержания текста. Устное высказывание строится нелогично, с многочисленными лексическими и грамматическими ошибками, затрудняющие понимание высказывания, отсутствие развернутой аргументации, используется ограниченный словарный запас.

## 4. Оценочные материалы для организации текущего контроля успеваемости обучающихся

Форма, система оценивания, порядок проведения и организация *текущего контроля успеваемости* обучающихся устанавливаются Положением об организации текущего контроля успеваемости обучающихся.

#### 4.1. Комплект заданий для самостоятельной работы обучающихся

#### 1. Перевод, реферирование, аннотирование текстов:

#### Необходимые умения:

- пользоваться учебной, научной, научно популярной литературой, сетью Интернет;
- понимать основные идеи текстов, как на конкретные, так и абстрактные темы, включая узкоспециальные в профессиональной сфере;
- суммировать полученную информацию из разных устных и письменных источников, вкратце изложить и обосновать свое мнение;
- умение составить четкое и детализированное сообщение;
- понимать прочитанное;

#### Необходимые знания:

- грамматического материала, необходимого для чтения и перевода научной литературы по специальности
- лексического минимума в объеме до 5500 учебных лексических единиц общего и терминологического характера;
- орфографической, орфоэпической, лексической, грамматической и стилистической норм изучаемого языка в пределах программных требований и правильно использовать их во всех видах речевой коммуникации, в научной сфере в форме устного и письменного общения.
- навыков грамотной речи и последовательного изложения своих мыслей

Introduction to politics of climate change: discourses of policy and practice in developing countries

The past 20 years have witnessed a momentous surge in interest in the idea of climate change. Much of this growth is due to the field of climate science, which has produced compelling evidence to show that human actions are significantly changing the composition of the atmosphere, which is altering the functioning of the climate system (IPCC 2007). It is also attributable to the tens of thousands of organizations, networks, companies, consultants and advocates concerned with a host of climate change related response issues, ranging from energy and infrastructure, to risk management and reduction, to community-based adaptation that have been spawned as a result. Many of these actors are supported by major financial investments. For example, in March 2010 the UK Department for International Development (DFID) announced that it would be investing £50 million in a new program, the Climate and Development Knowledge Network (CDKN), to 'help developing countries navigate the challenges of climate change'. This trend is set to continue with tens of billions of dollars of climate finance pledged by the international community over the next 10 years (COP 2009). In this way, climate change has become 'one of the defining contemporary international development issues' (Tanner and Allouche 2011, 1).

Studies of contemporary climate change from greenhouse gas emissions and land use changes originated in the natural sciences-based literature and the science-based institutions of the United Nations, particularly the Intergovernmental Panel on Climate Change (IPCC). This purely physical framing of the climate change issue adopted by the IPCC has dominated policymaking since the mid 1980s (Hulme 2007) and associated concepts – most notably 'mitigation' and 'adaptation' – have quickly garnered legitimacy in international debates (McNamara and Gibson 2009). However, in recent years, mounting efforts by the international policy community to link climate change interventions to human development goals that reduce poverty and promote equity have been challenged on the grounds that they systematically underplay critical cultural, socioeconomic, historic and political dimensions of human societies (Gaillard 2010; Mercer 2010; Marino and Ribot 2012; Farbotko and Lazrus 2011).

#### Ecology №2

In the field of environment and development, a concern with how people imagine human—climate interactions and therefore begin to build images or narratives about particular groups of people, geographical places or periods of time is not new (cf. Furedi 2007; Endfield and Nash 2002). Some scholars view these types of cultural conception as hegemonic, in the sense that they dominate thinking and structure institutional arrangements. For example, Bankoff (2001, 19), examining the historical roots of the 'hazard' discursive framework, argues that 'tropicality, development and vulnerability form part of one and the same essentialising and generalizing cultural discourse that denigrates large regions of the world as disease-ridden, poverty-stricken and disasterprone', thus justifying Western intervention. Other scholars, however, see a greater plurality of images and narratives in which discourses can become powerful, but never completely hegemonic (Hilhorst 2001). This approach, for example, is used by McNamara and Gibson (2009) who show how the dominant representation of people living in the Pacific as 'climate refugees' by the international climate change community has been resisted by the islanders themselves, many of whom do not accord with the action of 'fleeing' as part of their vision for the future.

The papers presented in this Themed Section reflect both the hegemonic and more pluralistic positions outlined above. The articles are mostly case study based and focus on sub-Saharan Africa and Small Island Developing States (SIDS), which are considered ulnerable regions to climate change in the world (Christensen et al. 2007). The articles are organised around three interlinked themes. The first theme concerns the processes of rapid technicalisation and professionalisation of the climate change 'industry'. According to Escobar, development has 'fostered a way of conceiving of social life as a technical problem, as a matter for rational decision and management to be entrusted to the group of people – the development professionals –whose specialised knowledge allegedly qualifies them for that task' (Escobar 1997, 91). The effect of these processes is that the terms of the international development debate are substantially narrowed as the 'intellectual distance between donor and recipient is maintained', and potentially critical discourses are co-opted (Kothari 2005, 428)

#### 2. Письменный перевод.

Обучающийся выполняет: письменный перевод оригинального научного текста по узкой специальности на русский язык. Объем текста – 15 000 печатных знаков

Оценивание перевода:

Полный письменный перевод оценивается по следующим параметрам:

1) общая адекватность перевода, т. е. отсутствие смысловых искажений;

- 2) функционально-стилистическое соответствие текста перевода тексту оригинала и учет прагматических факторов;
- 3) соответствие норме и узусу языка перевода.

#### Критерии оценивания

- правильность ответа по содержанию задания (учитывается количество и характер ошибок при ответе);
- полнота и глубина ответа (учитывается количество усвоенных фактов, понятий и т.п.);
- сознательность ответа (учитывается понимание излагаемого материала);
- использование дополнительного материала;
- рациональность использования времени, отведенного на задание (не одобряется затянутость выполнения задания, устного ответа во времени, с учетом индивидуальных особенностей обучающихся).

A Trip to the Beach

Untangling the Mystery of Algal Blooms in the Great Lakes

This interrupted case study, designed for an introductory biology or environmental science course, introduces students to the complexity of ecosystems by examining changes in trophic interactions and abiotic factors in a freshwater ecosystem as a result of human actions. The case narrative describes the recent and undesirable appearance of decomposing algae (Cladophora glomerata) on a public beach in the Laurentian Great Lakes.

#### Task 1. Your objectives are:

- Illustrate the aquatic food chain in the Great Lakes ecosystem.
- List limiting factors to freshwater algae growth.
- Describe the perturbations caused by the invasive mussel species in the Great Lakes ecosystem.
- Model the scientific process of posing, testing, and rejecting hypotheses.

Keywords: invasive species; aquatic ecology; Great Lakes; trophic interactions; Cladophora; quagga mussels; zebra mussels; Lake Michigan; phosphorous

Task 2.

You are asked to use the scientific method by creating hypotheses and examining observational data to describe biotic and abiotic components of the Great Lakes ecosystem.

The case requires you to differentiate between benthic and pelagic environments (e.g., the influence of depth and phytoplankton density on light availability, and the availability of phosphorus) and the interactions between organisms in both environments.

You can also examine shifts in these interactions as a result of the newly introduced zebra and quagga mussels, which have ultimately resulted in the algae's presence on the beach.

Task 3.

There are also opportunities to discuss the impact of these ecosystem changes on people who own property and/or visit the beach.

- 4. It was a pleasure meeting you briefly at last week's Board of Trade event. After our chat at last week's meeting, it occurred to me that with Riviera approaching its 50th anniversary, it would be the perfect occasion to produce a Corporate History to celebrate your company's first half-century. With Riviera's 50th just around the corner, I'm sure that you have been thinking about ways to make that anniversary a special one. Accordingly, I would very much like to meet with you and show you some of the corporate work we have done, and brief you further on our services.

Forest-Atmosphere Exchange

Direct measurements of forest-atmosphere exchanges of carbon dioxide, water, energy, and other trace gases allow us to observe whole-ecosystem metabolism as well as quantify the role of forests as sources of trace gases, the input of gaseous pollutants and nutrients, and the role of forests in cleansing the atmosphere.

The eddy-covariance flux tower at the Harvard Forest Environmental Measurements Site (HFEMS) was installed in 1989 and provides the world's longest continuous record of net ecosystem CO2 exchange, evaporation, and energy flux between the atmosphere and a forest, at hourly time resolution. The CO2 exchange is partitioned into respiration and photosynthetic components.

Additional towers in a hemlock stand and a younger deciduous stand on Little Prospect Hill were installed to examine the differences in carbon flux due to species composition and stand age. At all three flux-tower sites, the forest is accumulating carbon and contributing to the terrestrial "sink" for carbon that currently is reducing the growth atmospheric CO2. The atmospheric carbon fluxes provide a top-down look at forest growth and are complemented by ground measurements of vegetation and litter at large and small plots where we can identify which components in the forest are gaining and losing carbon. The combination of short-term carbon and water exchange fluxes observed at the towers with long-term changes in biomass and species composition observed at permanent plots provides a very powerful constraint to develop and evaluate ecosystem process models.

Because of its rural location downwind of major east-coast urban areas, but away from nearby pollution sources, the Harvard Forest site is an important observatory for tracking regional air quality. In addition to the carbon flux measurements at HFEMS, we measure ozone and nitrogen oxide to quantify potential air pollutant impacts on the forest and assess the role of the forest in removing these pollutants from the atmosphere. Several measurement campaigns have focused on emissions of volatile hydrocarbons

such as isoprene from the vegetation. These compounds are an important precursor for atmospheric chemical reactions.

#### Критерии оценивания

- правильность ответа по содержанию задания (учитывается количество и характер ошибок при ответе);
  - полнота и глубина ответа (учитывается количество усвоенных фактов, понятий и т.п.);
  - сознательность ответа (учитывается понимание излагаемого материала);
- логика изложения материала (учитывается умение строить целостный, последовательный рассказ, грамотно пользоваться специальной терминологией);
  - использование дополнительного материала;
- рациональность использования времени, отведенного на задание (не одобряется затянутость выполнения задания, устного ответа во времени, с учетом индивидуальных особенностей обучающихся).

#### Шкала оценивания

Баллы	Степень удовлетворения критериям
для учета в рейтинге (оценка)	
86-100 баллов «отлично»	Обучающийся полно и аргументировано отвечает по содержанию вопроса (задания); обнаруживает понимание материала, может обосновать свои суждения, применить знания на практике, привести необходимые примеры не только по учебнику, но и самостоятельно составленные; излагает материал последовательно и правильно.
71-85 баллов «хорошо»	Обучающийся достаточно полно и аргументировано отвечает по содержанию вопроса (задания); обнаруживает понимание материала, может обосновать свои суждения, применить знания на практике, привести необходимые примеры не только по учебнику, но и самостоятельно составленные; излагает материал последовательно. Допускает 1-2 ошибки, исправленные с помощью наводящих вопросов.
56-70 баллов «удовлетворительно»	Обучающийся обнаруживает знание и понимание основных положений данного задания, но излагает материал неполно и допускает неточности в определении понятий или формулировке правил; не умеет достаточно глубоко и доказательно обосновать свои суждения и привести свои примеры; излагает материал непоследовательно и допускает ошибки.
0-55 баллов «неудовлетворительно»	Обучающийся обнаруживает незнание ответа на соответствующее задание (вопрос), допускает ошибки в формулировке определений и правил, искажающие их смысл, беспорядочно и неуверенно излагает материал.

Отмечаются такие недостатки в подготовке обучающегося,
которые являются серьезным препятствием к успешному
овладению последующим материалом.

#### 4.4. Комплект ситуационных задач

1. Написание друг другу делового письма.

#### Необходимые умения:

- понимать прочитанное;
- умение общаться на иностранном языке, что делает вполне возможным взаимодействие с носителями языка;
- умение составлять деловые письма;
- умение составить четкое и детализированное сообщение;
- умение переводить деловую корреспонденцию с иностранного языка на русский и с русского на иностранный.

#### Необходимые знания:

- грамматического и лексического материала, необходимого для составления и написания делового письма
- требования к речевому и языковому оформлению устных и письменных высказываний с учетом специфики иноязычной культуры;
- основные ресурсы, с помощью которых можно эффективно восполнить имеющиеся пробелы в языковом образовании (типы словарей, справочников, компьютерных программ, информационных сайтов сети Интернет, текстовых редакторов и т.д.);
- 2. Презентация по теме «Моя учеба в аспирантуре и исследовательская работа»

#### Необходимые умения:

- выступать с подготовленными сообщениями;
- обмениваться информацией и профессиональными знаниями на иностранном языке (устно и письменно);
- пользоваться мультимедийными технологиями

#### Необходимые знания:

• общих правил построения презентационных выступлений.

#### Критерии оценивания

- правильность ответа по содержанию задания (учитывается количество и характер ошибок при ответе);
- полнота и глубина ответа (учитывается количество усвоенных фактов, понятий и т.п.);
